SUMMARY

Experience conducting user research, prototyping in Figma, and translating customer insights into validated interaction and interface designs across B2B SaaS and consumer products. Comfortable operating in ambiguity, advocating for users, and collaborating cross-functionally from discovery through delivery.

EDUCATION

University of Washington

Seattle, Washington

Bachelor of Science | Informatics, Minor in Data Science

Jun 2027

- **Coursework:** Design Methods, Research Methods, Designing for Personal Health and Wellness, Data Structures & Algorithms, Product & Information Systems Management, Core Methods in Data Science, Client-Side Development, Databases and Data Modeling
- **Honors:** Dean's List Recipient (Throughout College), UW Purple & Gold Scholarship, Informatics Direct Admit, GPA: 3.83

WORK EXPERIENCE

Expedia Group

Seattle, WA

Product Manager

Jan 2026 - Mar 2026

- Conducted user research with 100+ Gen Z travelers via surveys and interviews, synthesizing findings into personas and journey maps that identified flights as the primary acquisition entry point
- Designed and iterated on Figma prototypes for OneKeyStudent, a student loyalty experience with curated deals and onboarding flows, validated through usability testing with an internal Expedia panel and presented to leadership

Loyalty Juggernaut Inc.

Palo Alto, CA

Product Management Intern

Jul 2025 - Oct 2025

- Mapped end-to-end user and system workflows in Figma, identifying friction points, edge cases, and interaction gaps across viewport sizes that reduced manual effort by 25% and unblocked downstream engineering
- Collaborated with engineering and client teams to translate ambiguous business needs into structured user stories and acceptance criteria, maintaining design integrity through scoping tradeoffs
- Tracked usability and adoption KPIs across 3+ post-launch iterations, surfacing at-risk trends and feeding findings back into design improvements
- Defined product requirements and PRDs for a revenue-generating Buy Points feature within an enterprise SaaS loyalty platform serving global airline and hospitality clients, conducting market analysis and competitive research across 5+ international programs to inform product positioning and roadmap planning
- Delivered stakeholder presentations and demos to 4 client companies, driving adoption and aligning implementation with business value

Microsoft

Seattle, WA

Product Consultant

Mar 2025 - Jun 2025

- Led user acceptance testing and validation for an AI-powered sentiment analysis tool, gathering structured feedback from the Microsoft client panel and incorporating it into product iterations
- Built internal data visualizations in Power BI to surface actionable insights, defining success metrics that grounded design decisions in measurable outcomes

LEADERSHIP & ACTIVITIES

Product Space Member

Seattle, WA

Product Space (UW Chapter)

Jan 2025 - Present

- Develop innovative, user-centric products by using data insights and collaborating with clients to solve real-world challenges
- Conducted interviews, reviewed applications, and hosted coffee chats to select and onboard 15+ members into the next cohort

INFO 380 – Product & Information Management

Seattle, WA

FashionForward | Supply Chain Traceability System (Quarter Long Group Project)

Sep 2025 - Dec 2025

- Designed interfaces, workflows, and data flows for a supply chain traceability system, applying component-based design system patterns and problem framing to balance usability with technical constraints for a 4-person team
- Applied A/B testing frameworks and funnel analysis to validate design assumptions and optimize the digital experience, connecting UX decisions to measurable business outcomes

SKILLS & INTERESTS

Technical: Python, SQL, R, Tableau, Power BI, Excel, Java, HTML/CSS, React, Jira, Figma, Azure DevOps, Jupyter Notebook, PowerPoint, C++

Product: Agile/Scrum, roadmap planning, requirements prioritization, KPI definition, AI requirements definition & use case scoping

Analytical: Data analysis, product analytics, A/B testing, funnel analysis, KPI tracking, statistical inference, Claude, ChatGPT, Gemini

Accessibility: WCAG guidelines, semantic HTML, ARIA attributes, component-based UI development
